

## Makes the Old Young Again

That is one of the missions of a good Piano—to make the old feel young again. The music of youth is remembered in old age and the hearts feel rejuvenated. You can appreciate this best by listening to one of our sweet-toned pianos, the product of the best makers in America. They are beautiful to look at, exquisite in tone and action, and perfect in their mechanism, being guaranteed for years. We sell them at very moderate prices and allow liberal terms.

## OIL and GAS NEWS

The Berwyn well was reported Sunday to be drilling at a depth of 810 feet. An oil showing is reported at 780. Leases are being taken in that section and it is probable that another well will be drilled to the east of this one in 27-33 east.

Mr. A. J. Hemstreet, vice president, and A. P. Sanders, general manager of the Terral Oil & Gas company with headquarters at Ardmore left this morning on No. 5 for Terral, Jefferson county, where they will join Dr. C. W. Shannon, director of the Oklahoma geological survey. Dr. Shannon and Mr. Sanders will make inspection of the company's holdings, consisting of more than 6,000 acres, with a view of locating three drilling sites. It is said that this section of Jefferson county is now attracting more attention from the prospector than any other section of the undeveloped oil territory of Oklahoma, and no doubt Dr. Shannon's report will be of considerable interest to the men who have spent their time and money in gathering acreage.

Mr. and Mrs. Lester G. Adams are in the city today from the fields.

F. E. Creagan of Guthrie, of the Creagan Lumber company, which has a yard at Wilson, is in the city today.

Conchana Petroleum Co. No. 4 on the Roy Chilton in section 4 made a flow yesterday and run 36 barrels in ten minutes. The company is trying to keep the well from producing until their big tank is up, and they have a place to put the oil. No. 4 is believed to be a better well than No. 2 which is making 90 barrels an hour. A visitor to the fields yesterday said he believed the Corsicana No. 3 to be the best well in the field.

The Tecumseh-Healdton well in section 14-43 is reported to be at a depth of 1,060 feet with a hole full of water, a water sand was encountered between the depths of 800 and 900 feet, the six-inch casing has been set, a wire line is on and the drill is making its way rapidly toward the center of the earth.

More than 300,000 barrels of oil are in storage in the Healdton field.

The Magnolia Pipe Line company run 8,100 barrels Tuesday and 7,862 barrels Wednesday. The general average will be kept to 8,000 barrels or a little better.

The Southern Oklahoma Oil Company is drilling in section 34, township 3, range 3, 500 feet, with a good showing. They commenced getting the blue shale at about 400 feet. This company has something over 2,000 acres, and part of it is in 14-43, and part in 15-43, which is proving to be good territory.

Rex No. 4 in section 9 is finished and the production is reported at 500 barrels.

Nichols-Conrad-Adkins in section 5 have cleaned out their big well, the flow of which was stopped by a cave-in, and the well is now making about 1,200 barrels. Their No. 2 one location east reached the first sand at about 950 and is drilling to the second sand. The first sand promised a production of about 250 barrels. Their No. 3 is being rigged up.

Westheimer-Nichols No. 3 on the E. R. Smith lease in section 5 reached the top of the sand and the well was still in the pay at 904 feet, where the well was finished. This well has an estimated production of 800 barrels.

Red River No. 4 Richards in the southwest quarter of section 9 finished at 1932 feet and has a production of 100 barrels.

The S. & M. Well in the southwest quarter of 9-43 is at a depth of about 1050 and has a hole full of water. An upper sand was found but it made a poor production. The well is drilling deeper.

An actual test on the Dosada well showed a production of 80 barrels in 24 hours. This is a very nice little well for that portion of the field.

The pipe line does not pre-rate the oil now, but the inspector in the field does that work, and the oil men state

that he has the hardest job a man ever held in any field. The producers are inclined to boost their production to obtain a better take of oil, and the inspector has to stand between the producers and the pipe line.

The samples of oil recently taken from the Healdton field by the Gulf Pipe Line people is said to have no pipe line significance. The Gulf has production in the field and merely desired to make a test of its own oil. This line is said to have all the oil now that it can care for, and is not seeking out new fields.

Ed Byrd is here from Midlothian, Texas. He is considering the matter of drilling a test east of the Berwyn well, which is now drilling in 27-33 east.

The Big Bear well in 26-5-4 is drilling at about 900 feet. The drill is encountering a strata of shale, then a strata of water sand and so on, as far as it has gone.

C. C. Stalti is now in Houston, and is expected back in the fields next week.

Crosbie No. 1 on the Cruce-Smith lease in section 5 was flowing nicely yesterday.

G. W. Strawn has finished his well in 33-3-3.

The oil fraternity is of the opinion that the Oklahoma City-Southwestern well in 34-3-3 is not a fair test, and that portion of the field should not be condemned at this time. The total depth of the well is 1928 feet, and it should be drilled at least 100 feet deeper.

The Ardmore Citizens company spudded in their well southwest of Ardmore a few miles yesterday, and made 50 feet.

### BASEBALL NOTES.

Denison here this afternoon for three games. Looks like Burgess or Francis for the opener.

Although Brooks Gordon's team started on the road trip tied for first place, and returned in third place, his team should gain some of the lost ground during the stay at home. Ardmore has eight games here, three with Denison, three with Bonham and two with Sherman, before hitting the road again.

Encourage the High School Mothers' club. Attend the benefit at the Auditorium Thursday afternoon and night.

People who know are going to buy a Majestic Range during our demonstration this week. You would too if you knew. Read our big ad in this paper. Bivens, Corbin & Erensley.

### Starts on Her Maiden Trip.

Berlin, May 14.—The new Hamburg-American liner Vaterland leaves here today on her first trip, bound for New York City. This is the largest ship afloat. She is a 58,000 ton line, 5,000 tons larger than the Imperator of the same line. She is 950 feet long and has a beam of 100 feet. She carries 82 life boats, which would accommodate all the 4,950 passengers and the 1,200 members of the crew, and there are two powerful motor life boats. This traveling palace has cost upwards of \$10,000,000, and is the handsomest, most complete vessel afloat today.

### Drillers

Wanted to make a drilling contract on 110 acres in Section 11, 4-4-4. R. A. Fox, 133

### FOR SALE

Two shares Healdton Oil & Gas stock in 31-3-3, also several shares in New Healdton Oil and Gas company. On market only few days. Make offer to Booster Office, Geary, Okla. 11-4

### Drilling Contract Wanted.

Want drilling contract in Healdton field. Rig now ready for work. H. W. Sanderson, Care Whitlington Hotel or 511 Juanita Bldg., Dallas, Tex. 11-3

Sherman Won in Ninth.  
Sherman, Tex., May 14.—Sherman defeated Durant in the ninth inning yesterday. The score: Durant 000 100 000—1-5-2. Sherman 100 000 001—2-4-4. John and Naylor; Black and Gray. Umpire—Roth.

## NEW OKLAHOMA STATE

# Map

ONE OF THE LARGEST AND LATEST EVER GOTTEN OUT. SIZE 42X54 INCHES

Price **ONE** Dollar

Shows townships, sections and ranges, population of towns, congressional and senatorial districts, railroads, distance scale of leading towns in state to leading towns in United States, shows late improvements that have taken place in different counties up to date. In Carter County it shows new Ringling railroad, town of Wilson, Joiner City, etc., also new interurban survey. Like improvement is shown in other counties. There are over two hundred new towns shown on this map and recent railroads throughout the state are shown.

There is no map in the state that can compete with this one. Ready for delivery in a few days.

## OWEN DENOUNCES DICTATOR HUERTA

(CONTINUED FROM PAGE ONE.)

the election machinery. Four days before the election, the senator said, despite formal assurances to the diplomats in Mexico City that he was not a candidate, election posters were sent broadcast urging the people to vote for Huerta. Huerta sent instructions to his governors, said the senator, to return the votes favorable to him and not to return more than a certain part of the precincts, thus insuring a void election. This program, he said, was carried out in every detail, and the Mexican congress, discovering that less than half the voting precincts had sent in returns, declared the election void and expressed a desire that Huerta continue as provisional president until some future time, which might be fixed by congress.

"Huerta," he added dramatically, "still is dictator."  
"Of the 28 elected governors of Mexico at the time Huerta seized the governing powers," the senator said, "only two at the end of the year remained at home attending their duties. Ten of them had joined the revolution, a number had fled the country, and one had been murdered by a major general of Huerta, who fled the governor of Chihuahua on the railroad track and backed a yard engine over him to teach him better manners than to oppose Huerta. All vacancies were filled by military governors appointed by Huerta."

"Huerta's federal officers of the army appear to have been instructed to take no prisoners. Every captured officer, high and low, was put before a wall and shot, most of the common soldiers taken prisoners were shot in like fashion and a few allowed to save their lives by joining the federal army. Every member of the cabinet named for Huerta was removed. Some of them fled the country, one of them was killed, but not one was left in the cabinet."

"During the fall of 1913 numerous evidences appeared of Huerta trying to involve the United States in some act of aggression or invasion. His purpose in doing this was to stir the

patriotism of the Mexican people, make them forget his crimes, and induce them to get behind him as a defender of Mexico against an invading foe. Finally, April 9, he had the impudence to arrest sailors in our uniform under the shelter of our flag, at Tampico, and march them in derision through the streets. He knew perfectly well that his private expression of regret was no amends to the government of the United States for this international affront and indignity.

"Huerta desired to provoke some action that would unite behind him the revolutionary leaders in Mexico, after which he might obtain his peace, relying upon the benevolence, the dignity, and the patience of the government of the United States. He has failed. The United States should not now, under any circumstances, be content with anything less than the most complete and absolute restoration of constitutional self-government in Mexico. Hundreds of our citizens have been killed in Mexico, thousands of them have been robbed, millions of their property stolen, and all driven by violence from Mexico. Huerta has sought to involve us in complications with Japan which might easily involve our nation in one of the bloodiest wars in history if permitted to be worked out.

"The president was not only justified in refusing to recognize Huerta as president of Mexico and in sending Vera Cruz to stop the landing of a shipload of machine guns and 2,000,000 cartridges, but he would have been fully justified in deposing Huerta by military force as a bloody despot and a treasonable usurper."

### Attention O. E. S.

There will be a special meeting of Ardmore Chapter No. 70, Order Eastern Star tonight, at 8 o'clock, for the purpose of initiating candidates. Let all take notice and be governed accordingly.

MOLLIE PEEL,  
Worthy Matron,  
ESSIE JACKSON,  
Secretary.
